- 3 Loosen the screw on the moving arm to enable it to slide onto the bar.

NOTES:

* The Mating faces must be kept clean and free from damage.

** The clamp must not be assembled/used without the split pin in place. If the pin is damaged/missing then replace with spares part No. C301248 below.

*** Do not use an extension bar on the allen key to tighten the cap screw otherwise the internal threads in the bar are likely to strip, in the event that this thread does get damaged it can be replaced:

Remove the damaged helicoil and replace it with a new one – see part No. C301247 below.
