SP SERIES

Double Column Machining Center

**Provide the accuracy and productive capacity
you need for profitable machining.**

- Rugged and precision construction throughout
- Heavy cutting capability
- Lifetime accuracy
- Improved surface finish

PERFECTLY DESIGNED TO OPTIMIZE MACHINING EFFICIENCY

Now, you can get the right double column machining center with the right features for extra heavy cutting operations. Each machine is quality constructed throughout with user-appreciated features.

APPLICATIONS

Top-One Double Column Machining Centers exhibit outstanding rigidity, precision, quality and performance. Each one is designed for machining large, complex parts and precision molds, and creates the accuracy and efficiency you've come to expect. To meet customers' specific machining requirements, custom specifications are available.

[Energy sector]

[Wind turbine]

[Electricity generation equipment]

is manufactured with the tradition of Top-One's quality excellence.

[Heat exchanger]

[Automotive industry]

[Ship building industry]

HEAVY DUTY! RUGGED! STABLE!

What you can expect from Top-One's machine structure!

- Exceptionally high dynamic accuracy
- Minimized thermal displacement
- Can handle heavy cutting
- Deformation free
- Improved surface finish

SCIENTIFIC RIB REINFORCEMENT

All structural parts of Top-One's double column machining centers are internally reinforced with comprehensive heavy ribs to resist flex and minimize vibrations.

Optimal reinforce ribbed bracket design for cross beam is capable for heavy load, high stiffness, anti-bending, and high accuracy.

The transverse & vertical reinforced ribbed for columns is constructed by inner and core boxes comes with thick wall design to have high rigidity, high stiffness, anti-bending and steady support on the cross beam

LARGE INTERNAL SPACE

The extra wide distance between columns in combination with extra long travel allows the machine to accommodate large workpieces.

MASSIVE, STABLE BASE

- The base is manufactured from high quality Meehanite cast iron, tempered and stress relieved to ensure material stability without deformation year after year.
- Scientific rib reinforcement in combination with a greater span between linear ways provides solid support for heavy loads.

DOUBLE V SLIDE WAY FOR X-AXIS (Optional)

The double V is an optional choice which designed to use Hydrostatic pressure system to hold the extremely heavy work-piece on the work table.

LARGE DIAMETER BALL SCREWS

- The 3 axes traverses are driven by high performance servo motors, which drive the ball screws, feature minimum backlash and long life.
- Ball screws are pre-tensioned to assure high-transmission accuracy at all times.

LADDER TYPE LINEAR WAYS ON BEAM

- The linear ways on the beam are supported by a ladder structure that upgrades stability of the spindle head.
- The heavy duty roller type linear ways combined with three slide blocks on each linear way guarantee greater rigidity on the y-axis.

TWO CHIP AUGERS ON BASE

Two chip augers are provided at the left and right side of the base, which deliver chips to the chip conveyor. The chip augers maintain machine cleanliness at all times.

SPINDLE

Gear Drive Spindle

4500 rpm (BT50)

6000 rpm (BT50) (option)

All Gear Spindle Head

TWO-STEP SPEED GEARBOX

- The spindle running is transmitted through a gearbox, providing high/low speed changes.
- The low speed range gives great torque output, making the machine excellent for heavy cutting. The high speed range is ideal for fine cutting with outstanding surface finish effects.
- All gears in the gearbox are carburized and precision ground for quiet running.

Spindle Speed 50~6000rpm

Spindle Speed 50~4500rpm

Fanuc-Spindle Motor α 18
Spindle Speed & Torque Curve

OPTIMAL SPINDLE HEAD LAYOUT

- The spindle center line closes to z-axis slideways, greatly reducing the possibility of thermal displacement and bending deformation due to side cutting torque.
- Driven by a powerful motor, the spindle head is ideal for various complicated machining with ultra-high accuracy.
- Spindle gearbox is designed as rectangular in cross-section and its structure is symmetrical closed. It ensures the spindle gear box symmetrical heat conduction and preventing thermal distortion and minimizing deflection.

HYDRAULIC & NITROGEN GAS DUAL COUNTER-BALANCING SYSTEM

- The nitrogen gas counter-balancing system is equipped with an accumulator, and no additional power unit is required.
- Features no noise and no vibration.
- It ensures extra smooth movement of the spindle head for increased machining accuracy.

FACE MILLING

Cutting tool: $\text{Ø}125 \times 8t$

Tangential speed: **295.35 m/min**

Cutting width: **120 mm**

Cutting depth: **4 mm**

Cutting feed rate: **140 mm/min**

Cutting amount per tooth: **0.27 mm**

Material removal rate: **756 mm**

Workpiece material: **S45C**

Spindle load: **80 %**

Cutting capacity
YOU'VE COME TO EXPECT!

EXTRAORDINARY CUTTING CAPABILITY

TOP-ONE double column machining centers will dramatically increase your productivity. Let our cutting tests prove it!

DRILLING

Tool diameter: **Ø90 mm**

Tool material: **Tungsten Carbide**

Cutting depth: **100 mm**

Cutting feed rate: **5 mm/min**

Workpiece material: **SUS304**

Spindle load: **48%**

Cutting Test Report

END MILLING

Cutting tool: **Ø32 x 8t**

Tangential speed: **158.6 m/min**

Cutting width: **6 mm**

Cutting depth: **20 mm**

Cutting feed rate: **120 mm/min**

Cutting amount per tooth: **0.21 mm**

Material removal rate: **187 c.c/min**

Workpiece material: **Ø125 x 8t**

Spindle load: **65%**

Note: The above cutting test values are for reference only. The values may vary with customers cutting conditions.

SPECIALTY OF THE HEAVING-DUTY CUTTING & OVERLOAD

Top-One is specialty in design and manufacture the heavy-duty and overload double column machining center.

All main castings are designed for high rigidity capability and made by high grade cast irons, no welding metal been used. Heavy table load models are using the double V slide way on X axis travel and adhesive Anti-deforming Turcite B on the slide way provide extended machine life and movement.

Use zero backlash gear driven on X-axis over 7 meters travel.

The driven is more powerful, high efficiency and better accuracy in movement.

All of the contact surfaces with the box way are hand scrapping by our extraordinary scrapping craftsmanship to achieve the accuracy of the each machine. Microalignment by hand scrapping can make the machine stronger foundation and higher level of accuracy.

Table V slide way distribute the oil to X axis box way to ensure the X-axis has sufficient and steady oil lubricate. And Individual lubricated system can be filter the lube oil and recycle.

STANDARD ACCESSORIES

CNC CONTROLLER

FANUC 0i-MF

MITSUBISHI M70V

SIEMENS 828D

PENDENT ARM TYPE FOR CONSOLE

360 degree swivel for the Console, easy use for the operator, the pendant arm can left/right any angle movement, up/down movement.

Full guarding enclosure, over 5 meter in X-axis travel.

SPINDLE OIL COOLER

- The spindle oil cooler can be adjusted as desired to control the spindle temperature.
- It provides an outstanding cooling effect that reduces gear temperature, ensures consistent spindle accuracy and extends service life of spindle and gearbox.

HIGH PRESSURE AUTOMATIC LUBRICATOR

- The high pressure forced automatic lubricator employs an oil distributor. Once pressure reaches its peak, all lubrication points are released.
- The oil circuit features pressure detection and feed back. It can detect oil circuit jamming and leaks. This allows all lubrication points to be properly lubricated at all times, and ensures a longer service life and accuracy of the machine.

OPTIONAL ACCESSORIES

COOLANT THROUGH SPINDLE:
(20bar/50 bar/70bar)

CHAIN-TYPE MAGAZINE (OPTIONAL)
40, 60 TOOLS

- The tool magazine accepts BT50 tool shanks.
- The tool magazine is side mounted to prevent contamination from chips or coolant.
- Customize tool magazine capacity

- Upgrade to 6000rpm gear head
- Chain type magazine: 32T/40T/60T
- 4th axis rotary table
- Auto tool length measurement
- Auto work-piece measurement
- Linear scale feedback
- 90° / 45° angular milling head
- Universal milling head
- Coolant Through Spindle(70/bar)
- Oil water separating tank

KEEPING OUR CUSTOMERS IN THE LEAD

Top-One Machinery Co., Ltd. is an internationally recognized manufacturer of vertical machining centers and double column machining centers. Based on our outstanding R & D capabilities, company structure and experience, we are capable of both the design and manufacture of machining centers that feature greater machining capacity, higher accuracy and minimum trouble. Our objective is to offer the best possible machining centers to help customers stay competitive.
